

Design and Construction Winner
DCAM AWARDS FOR EXCELLENCE PROGRAM 2008

Plymouth Trial Court

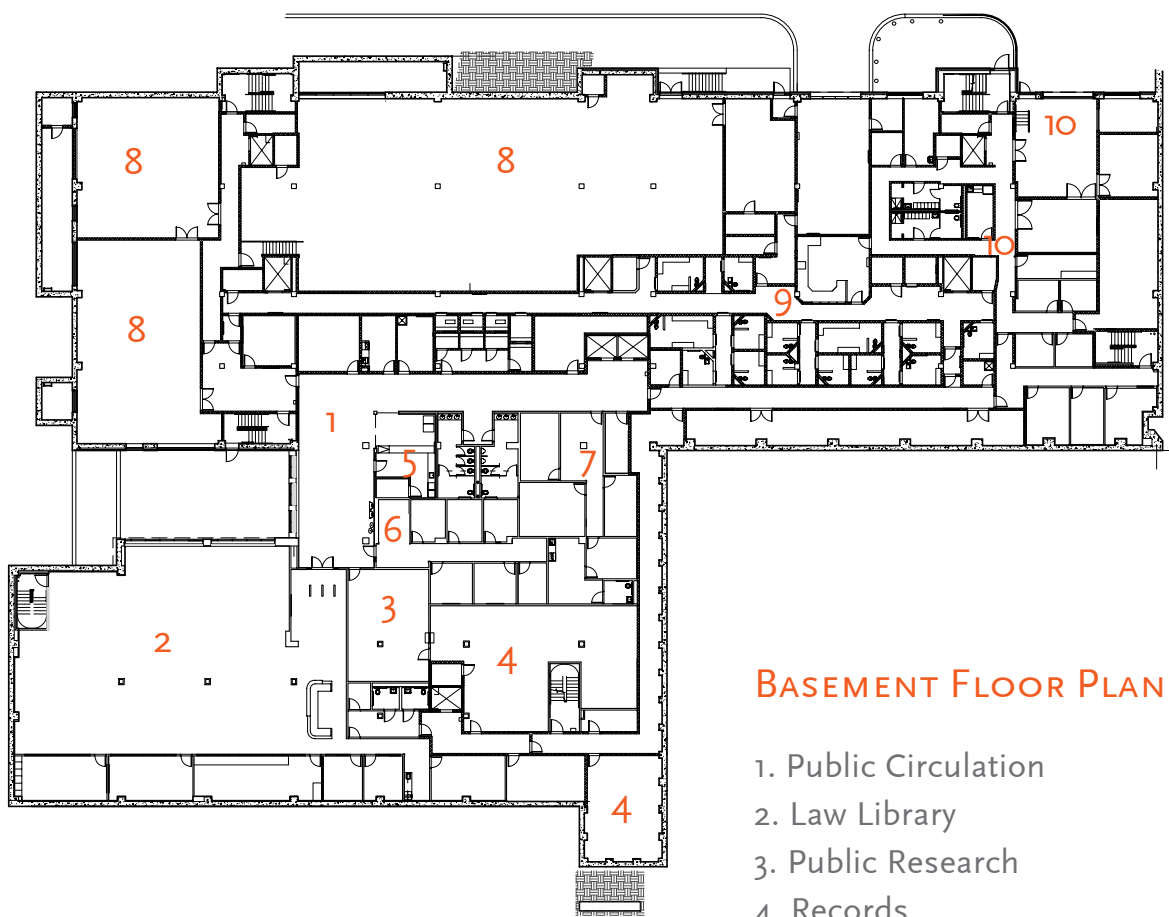

PLYMOUTH, MASSACHUSETTS

The new Plymouth Trial Court is a 189,154 square foot facility for the Trial Court of the Commonwealth of Massachusetts consisting of ten (10) Courtrooms, a Law Library, District Attorney's Offices, and related support and transaction spaces. The building provides space for the Superior, District, Housing, Juvenile & Probate and Family Court Departments in a single facility.

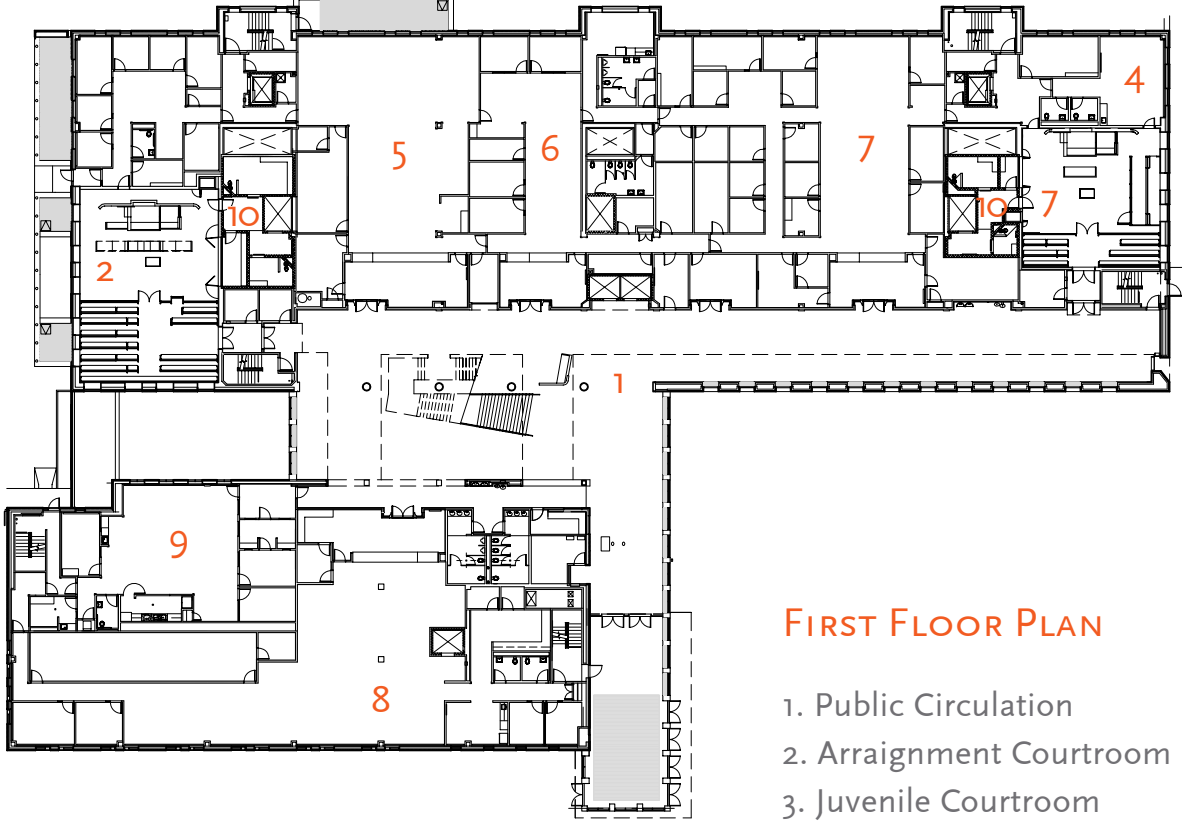

The courthouse is contextually sensitive to the important historical surroundings of the Town of Plymouth. The architects studied several prominent local buildings including the current Plymouth Courthouse, the public library, and Cordage Park to develop a language and palette of materials that would be respectful of the local tradition, but would also be suitable for modern construction methods and sustainability, while maintaining a thoughtful civic presence due a courthouse.

Completion Date	2007
Project Size	189,154 square feet
Project Cost	\$71,000,000
